

# Township acreages from Morehouse

Morehouse, H.J. (1861, *The History and Topography of the Parish of Kirkburton and of the Graveship of Holme*) gives two versions of the acreages of the Holmfirth townships. At the end of each township's account he give the acres anclosed in the C19th and of ancient enclosures. There is also a summary on p35. There are discrepancies between township and summary figures for Fulstone and Upperthong. The errors are likely to have been in the summary table but both versions are given here. Thurstonland is included so that the acreages can be compared with those implied in the figures given in Domesday where Thurstonland is included in the Cartworth vill.
